Looking for full time Software Engineer roles requiring sponsorship
Dallas-Fort Worth Metroplex

Summary

Senior Backend Engineer with 8+ years designing and scaling distributed systems, event-driven platforms, and microservices. Architected multi-region messaging systems supporting 300+ microservices, processing 2M+ events/day and scaling to 10K RPS peak throughput with high availability and production reliability. Experienced in AWS cloud infrastructure and building AI-powered backend services and agentic workflows. Key wins:- Led zero-downtime schema migrations with full backward compatibility across 300+ services.- Improved reliability with better retry/dead-letter handling, monitoring/alerting, and incident reduction.- Built REST APIs and serverless workflows (Lambda/ Step Functions/API Gateway) with CI/CD and automated testing.- Reduced API latency by 40% through caching, query optimization, and performance tuning. Cloud & stack: Node.js/Java/ Python/TypeScript, AWS (Lambda/ECS/EC2/API Gateway/S3/ CloudFormation), Docker/Kubernetes, RabbitMQ, PostgreSQL/ MySQL/DynamoDB/MongoDB, Prometheus/Grafana, OpenAI API + LLM integration.

Experience

SS&C Intralinks

4 years 3 months

Senior Software Engineer

July 2022 - Present (4 years 3 months)

Architected and owned a multi-region event-driven messaging platform supporting over 300 microservices and mission-critical enterprise workflows. Designed and operated highly available backend services processing over 2M events/day at peak throughput of 10K RPS. Built scalable REST APIs and backend services enabling reliable communication across distributed cloud-native applications. Improved platform reliability through retry redesign, monitoring, observability, and incident response, significantly reducing production issues.

Software Engineer

July 2022 - April 2025 (2 years 10 months)

Idexcel

Software Engineer

September 2020 - July 2022 (1 year 11 months)

Dallas, Texas, United States

Developed scalable Node.js backend services and REST APIs supporting enterprise monitoring platforms serving high-traffic applications. Built cloud-native backend applications using AWS Lambda, API Gateway, and Step Functions. Improved software quality through automated testing, CI/CD pipelines, and production monitoring.

Axxess

Engineering Intern

January 2020 - March 2020 (3 months)

Dallas, Texas, United States

Tata Consultancy Services

1 year 11 months

Assistant System Engineer

September 2016 - July 2018 (1 year 11 months)

Mumbai, Maharashtra, India

Software Engineer

September 2016 - July 2018 (1 year 11 months)

Developed responsive React-based enterprise web applications using JavaScript and integrated REST APIs to deliver customer-facing features. Reduced API response latency by 40% through backend optimization, efficient query design, and caching. Improved API scalability and distributed system performance by modernizing enterprise backend services.

Education

The University of Texas at Dallas

Master's degree, Computer Science · (2018 - 2020)

VR Siddhartha engineering college

Bachelor's degree, Computer Science · (2012 - 2016)

The University of Texas at Dallas
Master of Science, Computational Science

SIDDHARTHA ENGINEERING LIMITED
Bachelor of Technology, Information Technology
